➤ Healthcare and Wellness

The website can be a hub where users can explore and book wellness services like personal training, yoga classes, and massage/physiotherapy.

- It ensures that wellness services are accessible to users of all fitness levels, whether they're beginners or seasoned practitioners.

It's not just a booking tool but a gateway to a healthier lifestyle, making fitness and wellness more approachable and accessible for everyone.

- The home page would include an introduction
 - Maybe add a carousel
- Need a slick, clean booking page
 - It would be the same look for all services.
- Also a booking confirmation page.
 - Maybe use Bootstrap for a pop-up
